

Using GCC and Zone 99 with AudaMobile

AudaMobile allows you to use your customised Zone 99 file, if you have one. To use this you need to upload the file using the GCC portal. The basic steps to follow are:

Step 1

Log into **GCC** using your Company Code, Username and Password.

Step 2

Click on the AudaAdmin button

Step 3

Find out which upload screen you have to use to match your version of Windows (32bit or 64bit) using the Help screen.

Step 4

Follow the steps to upload your Zone 99 file which include:

- Click on the "Select File..." button 
- Press and hold the "Ctrl" and "V" keys together when you see the "Choose File to Upload" window.

- Press the "Open" button

- Finally press the "Upload" button

Step 5

Launch **AudaMobile** on the iPad

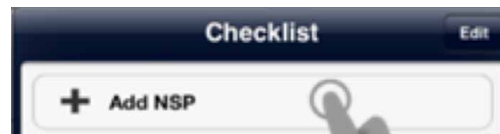

Step 6

Open an assessment and launch **Damage Capture**

Step 7

Tap on the **Checklist** button 

and choose "+Add NSP"

Step 8

Select the Zone 99 repair method from the groups in the list by scrolling and then choose the description.
